THE PRICE OF PEPPAR.

It Relped to Change the History of

In the sixteenth century all the pepper consumed in England was bought by the English merchants from the Dutch, who brought it from India. Owing to rapial jealousy, the Dutch traders in 1599 raised the cost from 8 shillings to 6 shillings per pound. This petty display of ill feeling caused considerable annoyance to the Euglish merchants and aroused in them that feeling of independence which has always been so characteristic of our race.

They determined to import their pepper direct from India in their own ships, and for this purpose formed a company, called the Governor and Company of Merchants of London Trading to the East Indies, and which in latter days became eventually known nigan of Reno. as the East India company,

WHY THE SMASH UP?

How many of those would-be political philosophers will concede that the Democrats were right in their prediction of the State conventions, or can they assign any reason for the smash up in the Silver party, other than the standing charge-greed for office, which means utter disregard for principle or party.-Pioche Mes-

The smash up of the Silver Party was caused by too much Southern Pacific Railroad. The rank and file of the party were honest in their intentions and actions, but the corporation agents, taking advantage of the intense bimetallic sentiment, used it to. serve their purpose, utilizing the patriotism of the people for the furtherance of their own selfish and nefareous ends. Many crimes have been committed in the name of liberty, but none greater than that against the State of Nevada in the name of silver: which was successfully juggled to rob the people of their political liberty and enslave them to a soulless gold-bug corporation, which is as bitterly opposed to the silver cause as its deluded victims are sincerely in favor of it. The devil may cite scripture to suit his purpose, and a gold-bug corporation, through its birelings, can spart and cant silver as glibly as the evil Silver party has out lived its usefulness to our political masters and they will seek some other organization fall. which they will endeavor to coutrol, and, through it, continue their desputie wealth. It will be through one or the other of the two great national parties, as quiet as the proverbial grave yard. and the fight for liberty two years hence, will be within the lines of the party selected by the corporation, wherein it will seek to prosecute its political work. It is now without a party in the State and unless it is permitted to gain a footbold in the Demcoratic or Republican organizations, it will be without a work shop or political home. Both of the parties are now comparatively free from the taint of Wallaceism, and if each will lock its doors against the lit'le railroad hords. which enters only to despoil, our State may free itself from the blighting curse of political surfdom, and claim such consideration and respect as it is now not entitled to, as the mere dependency of a despotic corporation.

OUR S. P. SENATOR.

THE Senatorial contest of 1899 is over and William M. Stewart has made good his boast that he would "be elected whether the people of Nevada wanted him or not." It is again decreed that he will represent the Southern Pacific Railroad in the Upper House of Congress and incidently misrepresent the State of Nevada. He received the bare-majority necessary to elect despite the tremendous power behind him. He is welcome to what consolation he may find in his victory. Certainly he cannot thank the free and independent people of Nevada for tion, they made a gallant if unsuccessful resistance to the machinations of the corporation agents, but as usual were betrayed by those whom they trusted, and their expressed will was thwarted.

William M. Stewart is nominally the Senator from Nevada, but he is not he told him the story of his lapse of toe choice of the masses and on a di- memory. rect vote could not muster 3 000 ballots in the State. He is now what he always friend. has been, the personal representative of the Southern Pacific Railroad and represents no constituency except that one. We are again entitled to the distinctive and opprobrious title of the "rotten borough," but at least have made an attempt to rid ourselves of it, happy dramatist.—Argonaut. and have demonstrated that there is a strong but unorganized element opposed to corporate rule in this State that at no distant day will find expression in "home rule for Nevada." -- Times-

THE contest now on is not one of party but of men. In fact, the same influence is at work in all the parties. Every candidate in the future who comes up must be forced to publicly pledge himself, not to a man, us has long been the case, but to the people of the State, that he will faithfully carry out their instructions if elected to office. - Silver State.

That's all right, but what if they break their pledges? A majority of the levislative candidates were pledged strongly enough, but that didn't prevent some of them from voting in di- make a choice. There are 70 different rect opposition to their solemn promises to the people. A little hempen alternative wouldn't be amiss, as an accompaniment in the instructions of their constituents.

Laughable Forgetfulness.

As Sheridan Knowles, the dramatist, was walking down the Strand one day with a friend he stopped to greet a gentleman, who, however, received him very coldly. "Do you know," said he to Knowles, "that you owe me an apol-

"An apology! What for?" asked the dramatist.

A certain man made a display of dense ignorance the other day when he went into a restaurant and asked the waiter if he had any eggs.

"Yes," said the waiter, "we have." "Well, bring me some."

"How do you want them cooked?"

"Oh, any old way!"
"My dear man," said the waiter, "that order will hardly do. We have over 500 different ways of cooking eggs, and you will be pleased to make a snggestion or mention a choice."

This astonishing fact had the effect of paralyzing the customer's tongue for awbile, and he finally recovered enough to whisper in awe, "Scramble 'em."

In the kitchen a wood box of largo size stood by the stove. It had a false bottom. In the upper part were "wood dirt," a plentiful supply of chips and so much stove wood that the impression would be conveyed that at least there was a good stock of fuel always on hand. The box was made of tongued and grooved boards, and one of these in the front could be slipped out, thus forming a door. Into this box all the food and silverware were put. No little ingenuity was needed in making this contrivance. The nails that were drawn out to let this board slip back and forth left tell tail nail holes, but these were filled up with heads of nails, so that all the boards looked just alike. I remember once a soldier was sitting

on this box while mother was cooking for him what seemed to be the last slice of bacon in the house. She was so afraid that he would drum on the box with his heels, as boys frequently do, and find that the box was hollow that she continually asked him to get up while she took a piece of wood for the fire. It was necessary to disturb him a number of times before he found it advisable to take the proffered chair, and in the meantime a hotter fire had been made than the small piece of meat re-

Board of City Council,

The Board of City Council held a meeting last evening at which the legislative representation of Washos county was present; also a representation of the Reno Water Company. Several propositions were offered tending to the acquisition by the city of its own water and light systems, but objections were made to all and the resuit is still an uncertainty as to what the ultimate plan or proposition will be. The concensus of opinion, however, is that a bill will be introduced calling for the issuance of a proclamation for a special election in the near future, providing for the acquiring of the property of the Reno Water Company and setting forth means whereby appraisers can be appointed for the purpose of estimating and fixing a Pruning tools and spray pumps, all reasonable price for the same, thereby kinds and prices, at Lange & Schmitt's. protecting the Water Company from less of capital invested and at the same time avoiding the payment by the city of an exorbitant price for the property.

It does not lie in the painter's fancy to imagine a prettier picture than that of a young girl, with, lips luscious with the promise of love, half parted in the smiles of happy dreamland. The mind of happy maidenhood is a clear and polished mirror, which, when the wits go wandering into the ghostland of dreams, reflects the impressions of waking hours. If those impressions are pleasant and painless and happy, she will smile in her sleep. If the impressions are pleasant and painless and happy, she will smile in her sleep. If the impressions are those of a suffering woman, tortured with the specual sliments to which the feminine organism is liable, the picture is spoiled by the lunes of suffering and despondency Maisdies of this nature unfit a woman for joyous maidenhood and for capable motherhood. They incapacitate her to bear the burdens of life in any sphere of action. Household, marital and social duties alike are a burden to the woman who is constantly suffering from headaches, backaches, dragging sensations and weakening drains. Dr. Pierce's Pavorite Prescription positively, completely, unfailingly cures troubles of this nature. It imparts health, strength, vigor to the distinctly womanly organs. It fits for carefree, healthy maidenhood, happy wifehood and capable motherhood.

free, healthy maidenhood, happy wifehood and capable motherhood.

"I have a little step-daughter who had St Vitus's Dance, which your medicine cured," writes Mrs T F Bose, of Ford, Dinwiddle Co, Va. "I spent about twenty dollars for doctor's bills and medicine, and it did not do the child one cent's worth of good We commenced giving Dr. Pierce's Favorite Prescription and Golden Medical Discovery' and used three bothers of each, which cost only any dollars. Now the child is running around every where and is just as healthy as ever."

What Ethel Saw.

One day as Ethel was sitting at the front window waiting for it to stop raining, so she could go out riding with her mother, she saw a little carriage, drawn by six ponies and driven by a lit-tle fairy He told Ethel to get in, which she did. In a few moments she saw a little house, from which strains of music and the merry peals of laughter were coming They stopped in front of the door, and the fairy jumped out and told Ethel to follow, but she said: "I cannot get through that door. I am too large ' The fairy handed her a bottle, from which he told her to drink. She took a drink and felt herself growing smaller and smaller, and at last she was small enough to go through the door

When she got in the room, she saw a merry eight, the fairies dancing, talking and having a very fine time. The fairy that had driven her there introduced her to the Queen Curly and King Curly

The queen introduced her to many other friends, and she had a very fine time.

The band was playing the last piece Ethel woke up and found it had stopped raining, and her mother had gone out riding and left her.—San Francisco

Alfonso's Santa Claus.

Santa Claus comes to little Alfonso regularly in the palace at Madrid as he comes to the commonest child here. The entire court of Madrid makes a gift to the little king, first collectively, then individually One year the court gave him a crown jewel to replace one that had been removed during the previous rogram will be rendered and refreshments | reign and never replaced. After the removal" of the gem the Spanish ki never dared to wear his crown in public and it lay in the vaults for ten years.

For many years it had a lopsided appearance, but the father of Alfonso had a piece of glass, a diamond paste jewel, set in the gap, and so the crown has remained until the court replaced

the gem a few years ago Alfonso's favorite personal gifts are animals and mechanical toys. He owns a navy that must be an aggravation to

the Spanish cabinet Personally the little king has few destres, for beyond dressing well in regulation drass he is a modest youngster, who is contented with the grounds of the palace and the society of such childran as are selected for him from the families of the nobles.

10 w STOCKHOLDERS MEETING.

The Smoky Chimney. In the designing and construction of

bouses it has always been the especial fad of Mr. Willis Polk, architect, to build a roomy fireplace, where great logs can burn, and he has always plumed himself on the fact that the fireplaces never fail to draw.

When he erected his bachelor bungs low at Tiburon, the fireplace was the chief pride and glory of the establishment. He told his friends about the solid comfort he enjoyed sitting before the blazing logs, and to still further arouse their envy Polk one night gave a party.

To his infinite chagrin, the chimney, smoked abominably and the bungalow was filled to stifling. After they had thoroughly guyed the disconsolate Willis the disgusted guests went home to

cough it off.

Next day Polk made a careful examination of chimney and hearth, satisfied himself that everything was now as it should be and then gave another party. That abominable chimney again spoiled it all. It smoked and smoked. Willis was in despair, but the next day it was all right again. At intervals after that Polk entertained friends, and he found that the fireplace never drew when he had company, although at other times it worked perfectly. So he set a little trap, which finally solved the puzzle. It was a little cracker box, placed over the top of the chimney, which caused all the trouble.

Some of his friends had thus theroughly covered up the chimney every time the young architect had planned an entertainment.—San Francisco News Letter.

Oplum.

Like most of nature's products opium is classified in grades. The growers of India, in white turbans and gowns, sit New York World. in the blazing sun waiting for their opium to be sorted, when they go to market. The unrips poppy seed pod has been out into five times and the milky sap dried in the sun and kneaded into cakes, the best of which are covered with dried leaves, and thus brought to market.

Oppum of the first class must be tough, smooth and a rich brown shade, bitter to taste and strong of scent.

In 1892 54 per cent of the suicides in India were from the use of opium, and one statistician credits 90 per cent of the women suicides to the same drug. However, twelve-thirteenths of the opium of India is sent to China for smoking. During Victoria's reign the Chinese have paid into the British treasury for Indian opium \$1,250,660,-

The Chinese government does all in its power to check the opium habit, the punishments common in the Chinese army for this habit being extreme. For the first offense a man may have his upper lip out, for the second he may be decapitated. For the last 60 years on an average a half ton of opium has been sent to China from India every hour. Atlanta Constitution.

Comparing Notes.

"My family can't help feeling a little proud of having been carried over by the Mayflower," said the young woman who was visiting in Chicago.

"Is that so?" answered the young man interestedly. "None of our folks ever went into the florist business. What brought us through was wheat." -Washington Star.

The extraordinary precocity of children of India has called forth the astonishment of a recent traveler, who says that many of them are skilled workness at an age when children are u rning the alphabet.

Auxious Little Sister. Dorothy has a baby brother who has recently been ill with the coming through of his first teeth. The baldness of baby's head has caused Dorothy great anxiety. She stood at the mother's knee one day, gently patting the little head. "Be careful, Dorothy," said the mother. "You know poor little brother

is sick. He is cutting teeth." Dorothy patted the bald head reflect-"Mamma," she said, "will it ively. make him sick when he cuts his hair? I'm afraid he'll have a tough time."-

A Peculiar Wagp.

The entomological editor of a Para newspaper has swelled the already unsqualed list of Brazil's noxious insects with a remarkable discovery. The new pest is a wasp with a spiral sting of unusual proportions. The insect, furthermore, lives in a phosphorus region, and its sting has the effect of impregnating the viotim in such a manner that everything he tastes and smells has a flavor of phosphorus.

The Real Reason.

Here is a juvenile story picked up by the Chicago News: What bright eyes you have!" said the visitor to 5-year-old Tommy. "You must get plenty of

sleep."
"Yes'm," he answered. "My mam ma makes me go to bed every night at 8 o'clock."

"That's to keep you healthy," said the visitor.

"No, it ain't," replied the youngster. "It's so she can mend my clothes."
